

Combustion analyzer

Next Gen testo 300 Professional Next Gen testo 300 Smoke Edition

Intuitive measurement menus with fast-response Smart-Touch display

Efficient, wireless simultaneous measurement of up to four testo Smart Probes (115i, 510i, 915i)

Practical second screen function and easy data integration into user-specific software

Documentation on site and reports sent by e-mail via testo Smart App

Wide variety of user changeable probes available

The compact Next Gen testo 300 Professional and Smoke Edition Combustion Analyzers are operated completely via the large touch display. You can see all the measuring values straight away on this without scrolling. The particularly scratch-resistant screen is embedded in a robust plastic housing which stands up reliably to the rigors of everyday use. From standby mode, the combustion analyzer is ready to go at the touch of a button. Menus for the most important measurements are already stored and they guide you safely through the respective application. The testo Bluetooth® Connector enables the efficient, wireless measurement of up to four additional parameters in parallel: The testo 115i Smart Probe for flow and return temperature measurement, the testo 510i Smart Probe for gas flow and static gas pressure measurement, and the testo 915i Smart Probe for combustion air temperature measurement.

All measurements appear automatically on the display and can be started and stopped in parallel. Thanks to the testo Smart App and second-screen function, you can keep a constant eye on all the relevant measurement data, even over long distances between the measuring instrument and the burner control. Reports can be created and sent directly on site via the Next Gen testo 300 and integration in the testo Smart App. You can easily call up the measurements stored on your Next Gen testo 300 and transfer them to your in-house software (via the previously programmed interface) using the new QR code feature. The Next Gen testo 300 Professional includes a 4-year warranty, optional NO Sensor, and optional CO dilution (Pro only max. 30,000 ppm) protecting the CO sensor. The Next Gen testo 300 Smoke Edition Kits include 2 year warranty.

Next Gen testo 300 - THERE'S NO ALTERNATIVE

Why make measurements complicated when you can keep them simple? The daily work routine is becoming more and more demanding. Time is getting scarcer, while processes are becoming more complex. On the other hand, some things unfortunately don't change: Instrument operation and documentation are cumbersome and time-consuming.

Intuitive measurement menus

with responsive Smart-Touch display

Efficient, wireless parallel measurement

testo Smart App for free download

But it doesn't have to be that way! Efficient, wireless measurement of up to four additional parameters in parallel via the testo Smart Probes – thanks to the new Next Gen testo 300! Featuring a practical second screen and intuitive operation – combustion analysis couldn't be easier.

Intuitive measurement menus with fast-response Smart-Touch display

The Next Gen testo 300 makes flue gas measurement unbelievably easy thanks to its intuitive operation. The Smart-Touch display responds immediately without any delay. Intuitive operation – just as easy as on your smartphone.

Efficient, wireless parallel measurement of up to 4 Smart Probes simultaneously

Wireless parallel measurements in record time

Efficient, wireless measurement of up to four additional parameters in parallel via the testo Smart Probes:

- **testo 510i:** Differential pressure measuring instrument (measurement of gas flow or static pressure)
- **testo 115i:** Temperature measuring instrument (measurement of flow/return temperature with 2 Smart Probes)
- testo 915i: Combustion air temperature measurement (time-saving without wired probes or additional measuring instruments)

Practical second screen function and easy data integration into user-specific software

Thanks to the practical second screen function and integration into the testo Smart App, you can keep a constant eye on all the relevant measurement data, even over long distances between the measuring instrument and the burner control

- this saves time and unnecessary journeys. Integrating the data from all readings into your user-specific software is easy:
- Option 1: via universal QR code (ZIV-compatible)
- Option 2: via Wi-Fi/Bluetooth[®] / App-to-App with the testo 300
