

InTemp[®] CX5000

CX Gateway

The CX Gateway links your InTemp data loggers seamlessly to the InTempConnect cloud-based data platform to provide real-time alert notifications for InTemp loggers automatically. Just place the Gateway within a 100-foot range of one or more loggers and connect it to your local Wi-Fi or Ethernet. If an excursion occurs, alerts can be sent from InTempConnect via email and text to a user-defined group of administrators.

In addition to flexible alarm notification capabilities, the CX Gateway can automate the process of downloading data from one or more InTemp loggers within range. It can automatically download loggers at fixed intervals – daily, weekly or monthly – or upon arrival of shipments. This saves time and eliminates the need to remove loggers to download them. No more missed downloads of temperature data for your critical temperature-sensitive shipments.

Included Items:

Mounting Kit AC adapter

Required Items:

InTempConnect account InTemp app BLE-enabled device
with iOS or Android CX series loggers

Key Advantages:

- Notifies you of temperature excursions anywhere, anytime
- Reduces the risk of loss
- Reduces the amount of time spent on data logger download and compliance
- Automates data downloads from InTemp CX400 and 500 Series loggers

InTemp CX5000 Specifications
