

### **TECHNICAL DATA**

# Fluke TruTest<sup>™</sup> Solar Data Management and Reporting Software

### STREAMLINED DATA MANAGEMENT

Manage test results, client and site data with ease, and create reports quickly using the intuitive, modern user interface and customreport builder

### SINGLE SOLAR PLATFORM

TruTest<sup>™</sup> enables solar testing, asset management, data storage and reporting on a single software platform that covers certification and documentation needs

### DASHBOARD INTERFACE

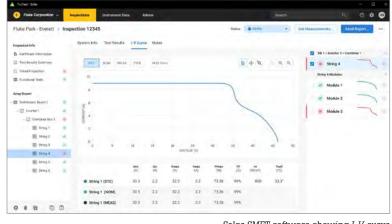

On-screen intuitive dashboard interface allows the user to see the status of all their clients instantly and navigate to further levels of detail if desired

### The easy-to-use data management solution

Fluke TruTest<sup>™</sup> Software is designed to eliminate the hassle associated with traditional solar system data management and reporting. Whether you are analyzing panel efficiency through I-V curves, or safety testing the system through the Category 1 test regime in conformance to IEC 62446-1, proper data management is critical for producing easy-to-understand reports for clients. Compatible with the Fluke SMFT-1000 Multifunction PV Tester and Performance Analyzer, TruTest<sup>™</sup> Software allows you to quickly and easily import measurement results directly from your solar multifunction tester to computer, organize and analyze the data, compare individual asset data against previous measurements imported and provide a comprehensive and visual client report.

With a streamlined user interface and intuitive workflow, measurement data can be easily formatted into printable test certificates and reports complete with your company logo and electronic signature.

- Easily manage measurement data
- Quickly create test certificates and reports
- Free updates for 5 years after installation
- Easy data collection and database transfers
- Enables manual data entry
- Intuitive user interface
- Fast and simple operations

Solar SMFT software showing I-V curve

### Compatibility

**TruTest**<sup>™</sup> is compatible with the Fluke SMFT-1000 Multifunction PV Tester and Performance Analyzer

### **Comprehensive Reporting**

Fluke TruTest<sup>™</sup> Software simplifies the reporting process so you can produce easy-to understand test certificates and reports as quickly as possible, saving you time and money. Easily visualize the status of assets with clear pass/fail results. Tests in accordance with standards such as IEC 62446-1 and EU directive 2009/104/ EC (BetrSichV) are available at the touch of a button, and a preconfigured template ensures that no matter your testing standards TruTest<sup>™</sup> Software has you covered.

#### **Tree topology**

Hierarchical tree topology is used to represent clients, sites, inspections with customizable asset levels including distribution boards, inverters, combiner boxes, strings and individual modules, making it ideal for use in PV systems of varying sizes while allowing you to maintain testing and reporting flexibility. Each element is presented as a single tree node and the properties of each node are presented after selection. Tree topology can be maintained by adding nodes, deleting nodes, duplicating nodes, duplicating subtrees and node editing.

### Demo software and software packages

After downloading start the installation by double clicking on the software file. The setup program will guide you through the installation procedure. Please follow the installation instructions displayed on the screen.

After purchasing TruTest<sup>m</sup> Lite or TruTest<sup>m</sup> Advanced, you will be provided with a code that will give you full access to the features purchased.
